

Our specialty is to ensure the highest network security for all of your important company data. Our objective is to provide a cost effective solution, with all of the necessary features you require. We now offer highly secure and powerful wireless network setups.

eChrysalis provides and implements **Bitdefender's Managed Antivirus Systems**. These systems include virus scanners, e-mail filters, dashboards to alert you when incidence occur, along with features required to protect enterprise computing assets.

There are many antivirus products that can provide good protection against a virus, but Bitdefender's suite of antivirus products reduces the likelihood that anything will get through. That why Bitdefender is rated the number 1 antivirus company globally.

Viruses are often a way for hackers to attempt to take over a system. Therefore, Bitdefender is your networks first line of defense.

Let Wwi help you decide what combination of Bitdefender antivirus products that are right for you and how to keep your network safe as new threats emerge.
